Do you like to be Tan?	Allergies to “Caines” or Epinephrine
Previous Facial Plastic Surgery	Vertigo
Auto-Immune Disease	

If you have circled any of the above contraindications please give details:

Dermasology® GOOD INFORMATION TO KNOW:

Our faces are asymmetrical and in constant motion. As we age and continue to move our faces they become even more asymmetrical. With this in mind, there will never be perfect symmetry in the final result, as it too will age along with the tissue it is on and be constantly in motion. The sides of our faces are sisters, not twins.

PMU is a two part procedure. For best results clients will be required to return for one retouch appointment 4-6 weeks after the FIRST procedure. Please be aware that color intensity will be significantly darker and sharper for a few days after the FIRST procedure, but the color will reduce by 20-30%

PMU is an art, not a science. Some skins may require a third visit; dry or oily skin, exposure to water, medications, smoking, mature skin, exfoliating skin care, picking or rubbing. A \$75 FEE WILL BE CHARGED FOR A 2ND FOLLOW UP (3rd visit).

Although medical grade topical anesthetic is used during the procedure, sensitivity or discomfort may still be felt. Skin may be red and /or swollen after the procedure, and there may be a “sunburn” sensation after the topical anesthetic wears off. Minor swelling and /or bruising can occur temporarily. Please give your skin time to heal.

Please wear your normal make up on the day of your procedure, but do not shape or wax your brows beforehand. Together we will determine the best shape, color and technique for you.

Botox, AHA products and retinoids should be avoided for 2 weeks before the procedure. Botox should only be administered after an eyebrow procedure. Exfoliating treatments such as microdermabrasion, chemical and laser peels should not be performed within 2 weeks after the procedure and never over the PMU site at any time.

Patients prone to cold sores/fever blisters should take an antiviral prior to a lip treatment.

Sterile disposable needles and non-toxic pigments are used to maintain the highest standard of hygiene. Infection can still happen with the multitude of environmental factors we are exposed to.

PLEASE WEAR SUNBLOCK OVER YOUR PMU!!!!!!!!!!

Dermasology® POST PROCEDURE CARE:

Please follow these instructions for 5 days after the procedure to improve and prolong the results. If you don't follow these instructions, it could greatly affect your PMU results.

Blot area with a damp paper towel or cotton every 30 minutes for 6 times (3 hours). After last blot apply sheer layer of Dermasology® Hydra Baume to area. Do not wash directly on area. Wash with Dermasology® Gentle Foaming Cleanser around the area and remove Cleanser with a cloth to avoid water directly on the eyebrow/eyeliner/lip area.

Swelling and redness of the tissue is normal. Please do not panic as it will heal and subside.

Do not pick, scratch, rub, wash directly on the area or soak in a pool or bath for 5 days. Flakes, if any, must fall off on their own or you will risk removing the color and possibly scarring. You may tap them to alleviate any itch.

Do not expose the treated area to direct sunlight. After healed (5 days) use sunscreen to avoid fading from the sun. A lip balm with SPF works wonders!

No makeup should be applied directly on the PMU site during the healing process.

If your PMU site gets wet during the healing process pat them dry with a towel DO NOT RUB.

If you are due to give blood after the procedure please inform your nurse about the PMU treatment you have had.

Dermasology ® CONSENT:

I fully understand and accept that non-toxic pigments are used during the procedure and that the result achieved may fade over a period of 1-3 years. Even once the color fades, pigment itself may stay in the skin indefinitely.

I have been informed that the highest standards of hygiene are met and that sterile disposable needles and pigment are used for each individual client procedure and visit.

I understand and accept that each procedure is a process requiring two applications of pigment to achieve desired results and that 100% success cannot be guaranteed during the first procedure. I understand that I will have to return for a follow-up procedure. If an additional (3rd) visit is needed there WILL be a \$75 charge.

The result of the procedure can be affected by the following: medication, skin age and condition, dry oily or sun-damage, thickness of skin, skin pH balance, body chemistry, and environment.

Upon completion of the procedure there might be swelling and redness of the skin which will subside within 1-4 days. In some cases bruising may occur. You may resume normal activities following the procedure, however, using cosmetics, excessive perspiration and exposure to the sun should be limited until the skin has fully healed.

I have been advised that the true color will be seen 4-6 weeks after each procedure and that the pigment may vary according to skin tones, skin type, age and skin condition. I understand that some skin types accept pigment more readily and no guarantee on exact color can be given.

I understand infection, inconsistent color, fading pigments can happen even with every precaution. Our skin is a live organ. PMU is an art and not a science.

I accept full responsibility for the decision to have this cosmetic semi-permanent pigmentation work done and for determining the shape, position and color of the PMU procedure as agreed during consultation.

By my signature below, I acknowledge that I have read and fully understand this agreement and ALL the information detailed above.
